- » **XII (MP Board)** | Aadharsh Boudhhik H. S. School, Indore **(2021)**
- » **X (MP Board)** | Vimal Vidhya Niketan H. S. School, Indore **(2019)**

## PROJECT EXPERIENCES

- » **Music Player Card:**
  - Designed and developed a responsive music player card using HTML, CSS, JavaScript, and the Spotify API.
  - Embedded Spotify playlist for real-time music playback. Implemented a separate song search function allowing users to find and play songs. Playback controls: play, pause, next, previous, and like options. Responsive design for various devices.

- » **Card Game:**
  - Developed an interactive card game using ReactJS. The game involves matching pairs of cards and includes features like shuffling, flipping, and tracking the player's score. This project helped in understanding state management and event handling in React.

- » **Profile Card :**
  - I created an interactive profile card for myself, Bulbul Tomar, featuring my profile picture, name, and location. The card includes buttons for messaging me and viewing my resume. Additionally, I've added links to my LinkedIn and Instagram profiles, using CSS for styling and JavaScript for interactivity. This profile card is designed to provide a concise and engaging summary of my professional and social presence on a webpage.

- » **Portfolio:**
  - Developed a comprehensive portfolio using ReactJS, showcasing my projects, education, contact information, and resume. This portfolio highlights my technical skills, achievements, and professional experience in a visually appealing and interactive manner.
